

Introducing Medical Anthropology A Discipline In Action

Merrill Singer, Pamela I. Erickson

Introducing Medical Anthropology Merrill Singer, Hans Baer, Alex Pavlotski, Debbi Long, 2019-03-20 The third edition of *Introducing Medical Anthropology: A Discipline in Action*, provides students with a first exposure to the growing field of medical and health anthropology. The narrative is guided by unifying themes. First, health-oriented anthropologists are very involved in the process of helping, to varying degrees, to change the world around them through their work in applied projects, policy initiatives, and advocacy. Second, the authors present the fundamental importance of culture and social relationships in health and illness by demonstrating that illness and disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology. Third, through an examination of the issue of health inequality, this book underlines the need for an analysis that moves beyond cultural or even ecological models of health toward a comprehensive biosocial approach. Such an approach integrates biological, cultural, and social factors in building unified theoretical understandings of the origin of ill health, while contributing to the building of effective and equitable national health-care systems. NEW TO THIS EDITION All chapters have been updated or expanded. NEW: Chapter 8, "The Biopolitics of Life: Biotechnology, Biocapital, and Bioethics." • Revised text style for crisper language and livelier phrasing. Added a brief signposting of chapter content at the beginning of each chapter and review questions about the key issues and concepts at the end of each chapter. Expanded discussion of Zika, Ebola, gender and health, PTSD and psychological anthropology, geriatric health, the contemporary vaccine controversy, the internet and health, and the health impacts of fracking and nuclear energy development. Concluding chapter examines anthropologically informed strategies and visions for a healthier world.

Introducing Medical Anthropology Merrill Singer, Hans A. Baer, 2007 A new text in the growing field of medical anthropology.

Introducing Health Anthropology Merrill Singer, Hans A. Baer, Debbi Long, Alex Pavlotski, 2025-04-01 *Introducing Medical Anthropology: A Discipline in Action*, provides students with a first look at the growing field of medical and health anthropology. The narrative is guided by three unifying themes. First, health-oriented anthropologists are involved in the process of helping to change the world around them through their work in applied projects, policy initiatives, and advocacy. Second, the authors present the fundamental importance of culture and social relationships in health and illness by

demonstrating that illness and disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology. Third, through an examination of the issue of health inequality, this book underlines the need for an analysis that moves beyond cultural or even ecological models of health toward a comprehensive biosocial approach. Such an approach integrates biological, cultural, and social factors in building unified theoretical understandings of the origin of ill health, while contributing to the building of effective and equitable national health-care systems.

Introducing Medical Anthropology Merrill Singer, Hans A. Baer, 2011-11-04 This revised textbook provides students with a first exposure to the growing field of medical anthropology. The narrative is guided by unifying themes. First, medical anthropology is actively engaged in helping to address pressing health problems around the globe through research, intervention, and policy-related initiatives. Second, illness and disease cannot be fully understood or effectively addressed by treating them solely as biological in nature; rather, health problems involve complex biosocial processes and resolving them requires attention to range of factors including systems of belief, structures of social relationship, and environmental conditions. Third, through an examination of health inequalities on the one hand and environmental degradation and environment-related illness on the other, the book underlines the need for going beyond cultural or even ecological models of health toward a comprehensive medical anthropology. The authors show that a medical anthropology that integrates biological, cultural, and social factors to truly understand the origin of ill health will contribute to more effective and equitable health care systems.

Culture and Health Michael Winkelman, 2005

Introducing Cultural Anthropology Brian M. Howell, Jenell Paris, 2019-06-18 What is the role of culture in human experience? This concise yet solid introduction to cultural anthropology helps readers explore and understand this crucial issue from a Christian perspective. Now revised and updated throughout, this new edition of a successful textbook covers standard cultural anthropology topics with special attention given to cultural relativism, evolution, and missions. It also includes a new chapter on medical anthropology. Plentiful figures, photos, and sidebars are sprinkled throughout the text, and updated ancillary support materials and teaching aids are available through Baker Academic's Textbook eSources.

Reimagining Global Health Paul Farmer, Arthur Kleinman, Jim Kim, Matthew Basilio, 2013-09-07 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together

ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

Action Learning in Practice Mike Pedler,2011 Previous editions of this book established themselves as authoritative overviews of action learning practice around the globe. Given the increase in action learning activity since this book last appeared, the demand for an up-to-date edition has grown. Whilst chapters on action learning are now obligatory in every collection on leadership and management development, there is still no competing specialist work of this nature.

The Oxford Handbook of Medical Ethnomusicology Benjamin Koen,2011-04-27 This volume establishes the discipline of medical ethnomusicology and expresses its broad potential. It also is an expression of a wider paradigm shift of innovative thinking and collaboration that fully embraces both the health sciences and the healing arts.

Reclaiming a Scientific Anthropology Lawrence A. Kuznar,2008-09-11 This second edition of *Reclaiming a Scientific Anthropology* arrives at just the right time, as new advances in science increasingly affect anthropologists of all stripes. Lawrence Kuznar begins by reviewing the basic issues of scientific epistemology in anthropology as they have taken shape over the life of the discipline. He then describes postmodern and other critiques of both science and scientific anthropology, and he concludes with stringent analyses of these debates. This new edition brings this important text firmly into the 21st century; it not only updates the scholarly debates but it describes new research techniques—such as computer modeling systems—that could not have been imagined just a decade ago. In a field that has become increasingly divided over basic methods of research and interpretation, Kuznar makes a powerful argument that anthropology should return to its roots in empirical science.

Ocasão George E. Marcus,Fernando Mascarenhas,2005 Anthropologist George Marcus and Fernando Mascarenhas, Marques of Fronteira and Alorna, reveal the key relationship between anthropologist and subject through their letters and commentaries. This innovative and experimental ethnography is a reflection on the survival of the contemporary Portuguese nobility. It will appeal to scholars of anthropological methods and fieldwork, and to researchers interested in the anthropology of elites and in Portuguese culture.

Critical Medical Anthropology Jennie Gamlin,Sahra Gibbon,Paola M. Sesia,Lina Berrio ,2020-03-12 *Critical Medical Anthropology* presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research,

including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

The Ontological Turn Martin Holbraad, Morten Axel Pedersen, 2017-03-23 This book provides the first systematic presentation of anthropology's 'ontological turn', placing it in the landscape of contemporary social theory.

Public Anthropology in a Borderless World Sam Beck, Carl A. Maida, 2015-07-01 Anthropologists have acted as experts and educators on the nature and ways of life of people worldwide, working to understand the human condition in broad comparative perspective. As a discipline, anthropology has often advocated — and even defended — the cultural integrity, authenticity, and autonomy of societies across the globe. Public anthropology today carries out the discipline's original purpose, grounding theories in lived experience and placing empirical knowledge in deeper historical and comparative frameworks. This is a vitally important kind of anthropology that has the goal of improving the modern human condition by actively engaging with people to make changes through research, education, and political action.

Medical Anthropology at the Intersections Marcia C. Inhorn, Emily A. Wentzell, 2012-07-19 This work offers productive insight into the field of medical anthropology and its future, as viewed by some of the world's leading medical anthropologists.

Creating a New Public University and Reviving Democracy Morten Levin, Davydd J. Greenwood, 2016-11-01 Public universities are in crisis, waning in their role as central institutions within democratic societies. Denunciations are abundant, but analyses of the causes and proposals to re-create public universities are not. Based on extensive experience with Action Research-based organizational change in universities and private sector organizations, Levin and Greenwood analyze the wreckage created by neoliberal academic administrators and policymakers. The authors argue that public universities must be democratically organized to perform their educational and societal functions. The book closes by laying out Action Research processes that can transform public universities back into institutions that promote academic freedom, integrity, and democracy.

Toward Engaged Anthropology Sam Beck, Carl A. Maida, 2013-07-01 By working with underserved communities, anthropologists may play a larger role in democratizing society. The growth of disparities challenges anthropology to be used for social justice. This engaged stance moves the application of anthropological theory, methods, and practice toward action and activism. However, this engagement also moves anthropologists away from traditional roles of observation toward

participatory roles that become increasingly involved with those communities or social groupings being studied. The chapters in this book suggest the roles anthropologists are able to play to bring us closer to a public anthropology characterized as engagement.

Medical Anthropology Thomas Malcolm Johnson, Carolyn F. Sargent, 1990

Ethnomedicine Pamela I. Erickson, 2007-11-14 People throughout time and place, no matter their belief system, have sought to discover causes and cures for illness and disease. Among Westerners is a groundswell to augment biomedicine with holistic practices inherent in ethnomedicines of non-Western traditions. Yet missing are awareness and knowledge of the foundations and outgrowth of these alternative concepts. Erickson fills this gap by clearly explaining the basic organizing principles that underlie all medical systems, the full range of theories of disease causation, the geographical distribution of medical practices, and the historical trends that led to biomedical dominance. Her efficient, balanced approach highlights commonalities among the world's vast and diverse medical systems, making ethnomedicine easier to internalize and to apply in clinical settings.
