*Problems of Conception* Marit Melhuus, 2012-08-01 The Biotechnology Act in Norway, one of the most restrictive in Europe, forbids egg donation and surrogacy and has rescinded the anonymity clause with respect to donor insemination. Thus, it limits people's choice as to how they can procreate within the boundaries of the nation state. The author pursues this significant datum ethnographically and addresses the issues surrounding contemporary biopolitics in Norway. This involves investigating such fundamental questions as the relation between individual and society, meanings of kinship and relatedness, the moral status of the embryo and the role of science, religion and ethics in state policies. Even though the book takes reproductive technologies as its focus, it reveals much about vital processes that are central to contemporary Norwegian society.

*Human Procreation* Council for Science and Society, 1984 This controversial report examines the techniques available to scientists and doctors working in human reproductive medicine, as well wider issues related to this research. It looks at the social, ethical, and legal issues raised by processes such as in vitro fertilization, embryo transfer, gene alteration, and the use

of spare embryos in research.

**Ethics Of In Vitro Fertilisation** Anthony Oakley Dyson,1995-01-01 Our Choices is a series which introduces specific subjects of concern and controversy within Christian ethics to a wide variety of readers. Each subject is approached at a serious level, but technical language is avoided. The books should be useful in introductory seminary programmes, in programmes for congregational development, and also to individuals seeking information and guidance within their Christian life. On 25th July 1978, Louise Brown, the first test-tube baby was born. This event captured the public imagination and made the ethical issues surrounding artificial fertilization and embryology impossible to ignore. In this text, Tony Dyson examines the religious and moral implications for the individual and for society of this and other reproductive technologies.

**Legal and Ethical Issues in New Reproductive Technologies** Canada. Royal Commission on New Reproductive Technologies,1993 The four studies that comprise this volume are, ostensibly, about legal issues arising from the existence and use of new reproductive technologies. At their base, however, they are about something much more fundamental - how we define the rights and responsibilities attached to the concepts of motherhood, fatherhood, and families, and what role we see the state as having in their regulation.--

Legal and Ethical Issues in Human Reproduction Bonnie Steinbock,2002 This collection of essays by thirteen leading international scholars in bioethics, law, philosophy and public health, addresses many of the most difficult and intriguing issues surrounding today's advances in reproductive medicine.

New Reproductive Techniques Douglas J. Cusine,1988 This book considers the major legal issues arising from medical treatment of, and research into, methods of alleviating infertility. While it concentrates on the British example, the book offers a global perspective.

**A Legal Framework for Bioethics** Cosimo Marco Mazzoni,1998-04-20 Over the past few years bioethics, as a discipline, has attempted to elaborate individual and collective behavioural codes in several fields, but it has come up against difficulties; it has not even been possible to reach a consensus between different countries on the general principles. An example of this is the recent Convention on Bioethics endorsed by the Council of Europe.
